EXAMINER

TYSON, MELANIE RUANO

ART UNIT	PAPER NUMBER
----------	--------------

3731

DATE MAILED: 06/09/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/811,555	Applicant(s) WAGNER ET AL. C	
	Examiner Melanie Tyson	Art Unit 3731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 12-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 12-22 is/are rejected.
- 7) ☒ Claim(s) 16 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 29 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☒ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Due to clerical error with the dates entered for submitted claims, the incorrect set of claims were previously examined. The previous office action is withdrawn and the new office action follows. Examiner regrets any inconvenience this may have caused.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Europe on March 28, 2003. It is noted, however, that applicant has not filed a certified copy of the 03 007 084.1 application as required by 35 U.S.C. 119(b).

Specification

3. The disclosure is objected to because of the following informalities:
In line 13 of page 7, the tissue is referred to as reference number "18", but the tissue has been defined as reference number "14". Change reference number "18" to reference number --14--. Appropriate correction is required.

Claim Objections

4. Claim 16 is objected to because of the following informalities: The claim contains the incorrect term "and". Since only one of the two options is to be selected, the term "or" should be used. Change "and" to --or--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3731

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-16, 18-20, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Dubrul et al. (Patent No. 5,431,676).

Regarding claim 12, Dubrul et al. disclose a dilation pin (Figure 4, element 80) having a distal end (78) and a diameter that increases proximally from the distal end (78). Figure 1 shows a tubular guide sleeve (10) having a length and an inside diameter that corresponds to the diameter of the dilation pin (80) at the distal end (78). Figure 9 shows the tubular guide sleeve being separable over the entire length along at least one line.

Regarding claim 13, Figure 1 shows a veress canula (40) having an outer diameter that corresponds to the inner diameter of the guide sleeve (10), since the veress canula passes through the guide sleeve (column 7, lines 27-29, 33-36, 41-42, and 52-55).

Regarding claim 14, Figure 9 shows a guide sleeve (10) comprising at least one longitudinally extending frangible area (line extending through guide sleeve 10).

Regarding claim 15, Figure 16 shows the guide sleeve (10) comprising two diametrically opposite longitudinally extending frangible areas, since it splits completely through both the top and bottom portions of the guide sleeve (10).

Regarding claim 16, Dubrul et al. disclose that each frangible area comprises one of a perforation or a regionally reduced wall thickness (column 7, lines 17-19).

Regarding claim 18, Figure 1 shows that the guide sleeve (10) has a proximal end (not labeled) with a holding element (32).

Regarding claim 19, Figure 2 shows the guide sleeve (10) has a distal end (42) that is tapered, since it becomes progressively smaller towards one end.

Regarding claim 20, Dubrul et al. disclose the guide sleeve (10) is manufactured of transparent plastic (polyethylene, fluorinated ethylene propylene, etc.; column 7, lines 11-14).

Regarding claim 22, Dubrul et al. disclose a tubular guide sleeve (10), and a dilation pin (Figure 4, element 80) having a distal end (78) and a diameter that increases proximally from the distal end (78). Figure 1 shows a guide sleeve (10) having a length and an inside diameter that corresponds to the diameter of the dilation pin (80) at the distal end (78). Figure 9 shows the tubular guide sleeve being separable over the entire length along at least one line.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dubrul et al. in view of Hall et al. (Patent No. 6,939,327 B2).

Dubrul et al. disclose a dilation system as described above, however, Dubrul et al. does not disclose that the guide sleeve is formed by at least two concentric sleeves. Like Dubrul et al., Hall et al. teach a guide sleeve (Figure 3b, element 82). Unlike Dubrul et al., Hall et al. disclose a guide sleeve (82) formed by at least two concentric sleeves (84 and 92); each sleeve (84 and 92) having at least one longitudinally extending frangible area (100 and 102) circumferential displaced from the frangible areas in each other concentric sleeve (column 8, lines 34-38). This dual sheath configuration improves kink resistance (column 8, lines 40-43). Therefore, to construct the guide sleeve of Dubrul et al. with at least two concentric sleeves as taught by Hall et al. would have been obvious to one of ordinary skill in the art at the time the invention was made in order to reduce susceptibility to kinking during use.

9. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dubrul et al. in view of Osypka (Patent No. 4,687,469).

Dubrul et al. disclose a dilation system as described above, however, Dubrul et al. does not disclose that the dilation pin comprises at least one cutter. Osypka teaches using a severing device (Figure 11, element 7) comprising a cutter (9) in order to sever a guide sleeve (Figure 12, element 6) that is not formed with a slit or with one or more longitudinally extending weakened portions (column 6, line 64 through column 7, line 6). It is obvious that this device could be used as a severing dilation pin. Therefore, to construct the dilation pin of Dubrul et al. with at least one cutter as taught by Osypka

Art Unit: 3731

would have been obvious to one of ordinary skill in the art at the time the invention was made in order to facilitate separating a guide sleeve that is not formed with a slit or with one or more longitudinally extending weakened portions.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Tyson whose telephone number is (571) 272-9062. The examiner can normally be reached on Monday through Thursday 7:30 a.m. - 5:00 p.m., alternate Fridays 7:30 a.m. - 4:00 p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan Nguyen can be reached on (571) 272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
